LET'S CLEAR THE AIR

You can help clear the air by cycling

More people and vehicles travelling more kilometres will affect air quality. More hot days can reduce our air quality because warmer and drier conditions increase the chance of smog, dust storms and fires.

Cycling saves money, reduces air pollution and improves your health and fitness. Improve air quality and reduce fuel costs by:

- cycling short distances instead of driving
- teaching and encouraging your children to cycle together to school
- cycling to work
- attaching a basket or rack and cycling to the shops.

Visit cleartheair.nsw.gov.au to find out how walking, enviro driving and using public transport can also help.
