LET'S CLEAR THE AIR

You can help clear the air by enviro driving

More people and vehicles travelling more kilometres will affect air quality. More hot days can reduce our air quality because warmer and drier conditions increase the chance of smog, dust storms and fires.

Driving differently can improve air quality and reduce fuel costs by up to 30 per cent. Improve air quality and reduce fuel costs by:

- keeping your car tuned, tyres at the correct pressure and driving at a moderate speed
- turning off your air conditioning and engine when you can
- removing unnecessary weight from your boot
- car pooling and sharing when you can.

Visit cleartheair.nsw.gov.au to find out how walking, cycling and using public transport can also help.
