LET'S CLEAR THE AIR

You can help clear the air

More people and vehicles travelling more kilometres will affect air quality. More hot days can reduce our air quality because warmer and drier conditions increase the chance of smog, dust storms and fires.

Improve air quality and reduce fuel costs by:

- **walking** short distances to work and the shops instead of driving
- **cycling** to work and encouraging your children to cycle to school
- **enviro driving** and reduce fuel costs by up to 30 per cent
- using **public transport** when you can.

Visit cleartheair.nsw.gov.au to find out how walking, cycling, enviro driving and using public transport reduces air pollution and saves you money.
