# LET'S CLEAR THE AIR

## You can help clear the air by using public transport

More people and vehicles travelling more kilometres will affect air quality. More hot days can reduce our air quality because warmer and drier conditions increase the chance of smog, dust storms and fires.

Public transport uses less fuel and creates less air pollution than car travel. Improve air quality and reduce fuel costs by:

- catching public transport to work
- encouraging your children to catch public transport to school
- using public transport to and from major events or outings.

Visit [cleartheair.nsw.gov.au](http://cleartheair.nsw.gov.au) to find out how walking, cycling and enviro driving can also help.
